

The Laser Therapy Continuum of Care

A Complete Approach to Pain Relief, Tissue
Healing, and Long-Term Care

 **Multi Radiance**
Veterinary Lasers

Proven Technology. Proven Outcomes.

∞ What is laser therapy?

— The Science Behind the Proven Technology

Laser therapy, commonly called photobiomodulation, is a non-thermal process that utilizes light to stimulate photo-physical events within the body. This technology supports a multi-modal approach to pain management, tissue healing, and the long-term management of chronic conditions.

Treatment parameters are determined based on clinical goals, the type of condition, and the size and color of your patient.

This “photoceutical” approach to care is non-invasive and drug-free. Photoceuticals are validated through clinical studies and use light in a specific dose to produce safe, and reproducible outcomes. Targeted laser therapy treatments can be used to reduce, or in some cases, eliminate the need for NSAIDs.

The Laser Therapy Continuum of Care

Activating Proven Technology to Achieve Consistent, Proven Outcomes

The Multi Radiance family of therapy lasers offer solutions for the entire continuum of care from acute pain to targeted tissue healing and long-term care.

1 STEP

Reduce Pain & Prepare

High power, large treatment area

2 STEP

Tissue Repair

Targeted, highly-customized protocols

3 STEP

Maintain Results

Take-home device for client compliance

NEW

ALPHAVET

Class 4 device quickly relieves pain to prepare tissue for targeted repair.

- Built-in protocols
- 0.5-28 Watts of power
- 4 wavelengths enable a wide range of clinical applications

ACTIVet PRO Series

Optimized for tissue healing based on condition and patient requirements.

- Battery operated
- Built-in protocols
- Blue light for wounds
- Wavelengths optimized for tissue healing

My Pet Laser 2.0

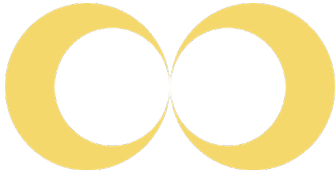

Lock-in results with a take-home device for ongoing maintenance treatments.

- Veterinarian-prescribed
- Easy-to-use
- Battery operated
- Add a new revenue model to your practice

Multi Radiance products are backed by the largest body of clinical research in veterinary medicine. Scan the code to browse studies.

The Laser Therapy Continuum of Care

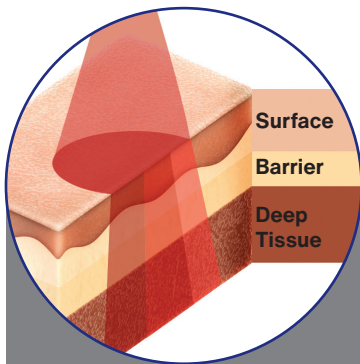

The Laser Therapy Continuum of Care is founded in a deep understanding of laser science. The Multi Radiance family of therapy lasers are engineered to provide the right tool in the laser therapy toolbox for every patient, and every stage of care.

How the technology works

— Translating the Science into Practical Technology for Veterinarians

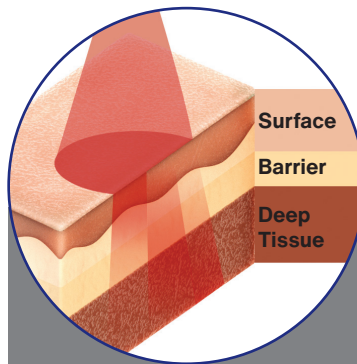

Treatment Parameters for Successful Outcomes

Wavelength

Determines which tissues absorb the light delivered to target tissue.

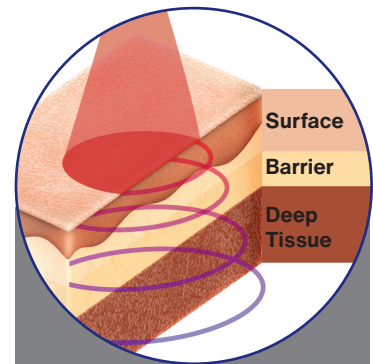

Optimized based on the absorption goals for target tissues, and based on condition

Power

Combined with wavelength, power determines depth of light penetration.

Prescribed based on the stage of care and pain relief or tissue healing goals.

Protocols

Enter your treatment parameters for a customized protocol that optimizes:

- Treatment Time
- Wavelengths
- Power
- Pulsing

Magnetic Field

Just like with MRI technology, Multi Radiance technology leverages static magnetic fields to focus laser energy at target tissue.

Blue Light

Bactericidal blue light technology supports infection control for wound healing, intra-operative, and post-surgical applications.

Continuum of Care →

The Right Technology for Every Stage of Care

Relieve Pain

Treatment protocols employ higher power to block pain and prime patients for tissue healing.

Protocols are designed to treat large areas to address the source and referral sites of pain.

Heal Tissue

After the pain is under control, targeted treatments support tissue healing.

Treatment protocols are highly targeted at the source of tissue dysfunction for cellular repair.

Maintain Relief

After short-term resolution is achieved, chronic conditions require on-going treatment.

Simple treatment programs address the target area for long-term relief.

NEW

ALPHAVET

High powered class 4 device for quick pain relief. Includes Multi Radiance's proprietary Priority Principle technology to optimize outcomes based on patient characteristics.

STEP 1: REDUCE PAIN & PREPARE

Built-In Protocols
Makes replicating treatments fast and easy

Variable Power
0.5-28 Watts enables versatile treatments

Easy-to-Use
Simple touchscreen interface

Treatment Modes
Continuous wave and pulsed operation

Priority Principle
Treatment optimization for pain relief

ACTIVET PRO SERIES

STEP 2: TISSUE REPAIR

Narrowly target damaged tissue with Super Pulsed technology designed to jump-start damaged cells. Use on wounds for added infection control benefits with blue light.

Built-In Protocols
Easily customize tissue healing protocols with built-in technology

Battery-Operated
Cordless device with 6 hours of battery life for portability

Treatment Modes
Continuous wave and pulsed operation

Priority Principle
Treatment optimization for tissue healing

My Pet Laser 2.0

STEP 3: MAINTAIN RESULTS

Improve outcomes, client compliance, and add a new revenue stream to your practice with the My Pet Laser 2.0 take-home device. Prescribe one of the 5 built-in protocols to lock-in clinical outcomes.

5 Built-In Protocols
Prescribe one of the 5 maintenance protocols

Battery-Operated
Cordless device with rechargeable battery for portability

Safe
Safe for at-home use by pet owners

Practice Builder
Increase client compliance and clinic revenue

Add a New Service to Your Practice

Use the Laser Therapy Continuum of Care to Drive Revenue

The Laser Therapy Continuum of Care allows your practice to increase revenue with in-clinic and laser rental services.

Add In-Clinic Service

Realize substantial ROI on the ALPHAVET or the ACTIVet PRO series of lasers with in-clinic services. Use these veterinary-grade lasers for:

- Acute conditions
- Post surgical applications
- Chronic pain relief
- Multi-modal pain relief
- Intra operative applications
- Tissue healing

Add a Pet Owner Rental Model

Use the My Pet Laser 2.0 to increase client compliance with treatment recommendations by adding a take-home laser rental model.

Prescribe protocols to add value to your existing treatments.
