Head of Companion Animal Marketing

The IMV Technologies Group acquires UD Vet B.V.

September 25th 2024, L'Aigle, France We are delighted to announce the acquisition of UD-Vet B.V. by IMV Technologies.

UD-Vet are a leading provider of Veterinary practice equipment and other veterinary imaging modalities, based in Utrecht, Netherlands and Brussels, Belgium with a reach throughout the Benelux region. Under the leadership of Remon van Rijn the business has developed into the leading veterinary supply and imaging supply business in the Benelux region. Remon comments that "we are very excited to be joining the IMV Technologies group to help us grow our business and provide an enhanced offering of products and services to our loyal clients throughout the region, IMV Technologies provides us a clear vision towards a successful future"

Alain de Lambilly; CEO of IMV Technologies, adds that UD-Vet is an exciting business and we warmly welcome Remon and his team to IMV Technologies. We have been very impressed by the depth and breadth of the product and service offering and the dedication of the UD-Vet team to provide outstanding solutions for their clients across Benelux. At IMV one of our core values is Innovation and we see an amazing commitment at UD-Vet to ensuring their clients have the tools and knowledge to provide advanced animal care. UD-Vet will join our growing and successful Companion Animal business, consolidating our position in the Benelux region. They will bring additional experience and products and enable us to provide our existing clients a wider product offering.

About IMV Technologies:

IMV Technologies is the world leader in animal assisted reproduction biotechnologies. Founded in 1963, IMV Technologies, a French company, has subsidiaries and/or manufacturing facilities in Brazil, China, France, India, the Netherlands, Scotland, Spain, Belgium, Sweden and the United States. IMV Technologies operates leading brands in the areas of semen analysis, assisted reproduction, artificial insemination, and veterinary imaging. IMV Technologies' Life Sciences Business unit, CryoBio System, manufactures and distributes equipment and supplies for human assisted reproduction and biobanking.
